

Wetwall 

Beautiful shower and wall panels

Our Heritage

We've been making Wetwall, the UK's best selling shower panel in our base in Perthshire, Scotland for the last twenty years and we still design, build and test all our Wetwall panels on site.

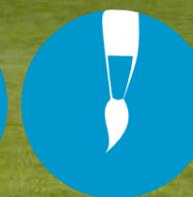

Our Panels now come with a no fuss 10 year guarantee and we are constantly adding new colours and decors to our ever expanding ranges.

Our Shower panels

Just because we think about shower panels all day long - we don't expect you to as well. This page just covers a few of the reasons why we think our panels are the perfect solution for any bathroom.

Guarantee

Our panels are guaranteed to remain watertight and waterproof for ten years from your date of purchase.

No small print. As long as they've been installed correctly, we're that confident of our system.

For full terms and conditions see www.wetwall.com

No Grout

Unlike tiles no grout is required to fit the Wetwall system. This means less time to fit and an expert fitter is not required, which on average makes the Wetwall system around 25% cheaper than tiles.

This also means that unlike tiles panels require very little maintenance, to keep them looking clean.

Waterproof

Our panels are constructed by bonding High Pressure Laminate (HPL) to a Medite MR MDF core using a PVA (D4 rated) adhesive system to give a completely waterproof surface.

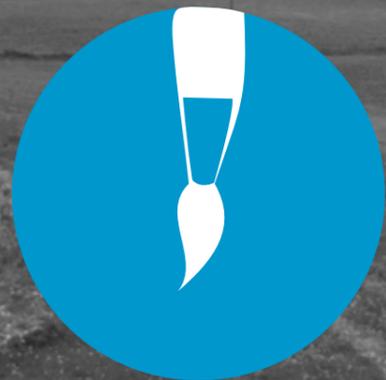

This meets all the requirements of EN438.

A balancing laminate is bonded to the reverse of the panel also using the PVA adhesive system. This ensures the panels structural stability.

Ecological

Laminated panels feel much warmer than tiles and have a significantly lower u value (Thermal insulation) 3.4 typically compared to 5.9 (tiles). The effect of this is the room loses less heat and is therefore more efficient.

Also because our panels are guaranteed for 10 years which is significantly greater than alternative materials, this reduces the need to be replaced as frequently hence the obvious environmental effect.

Unique Designs

We offer our panels in four different style ranges.

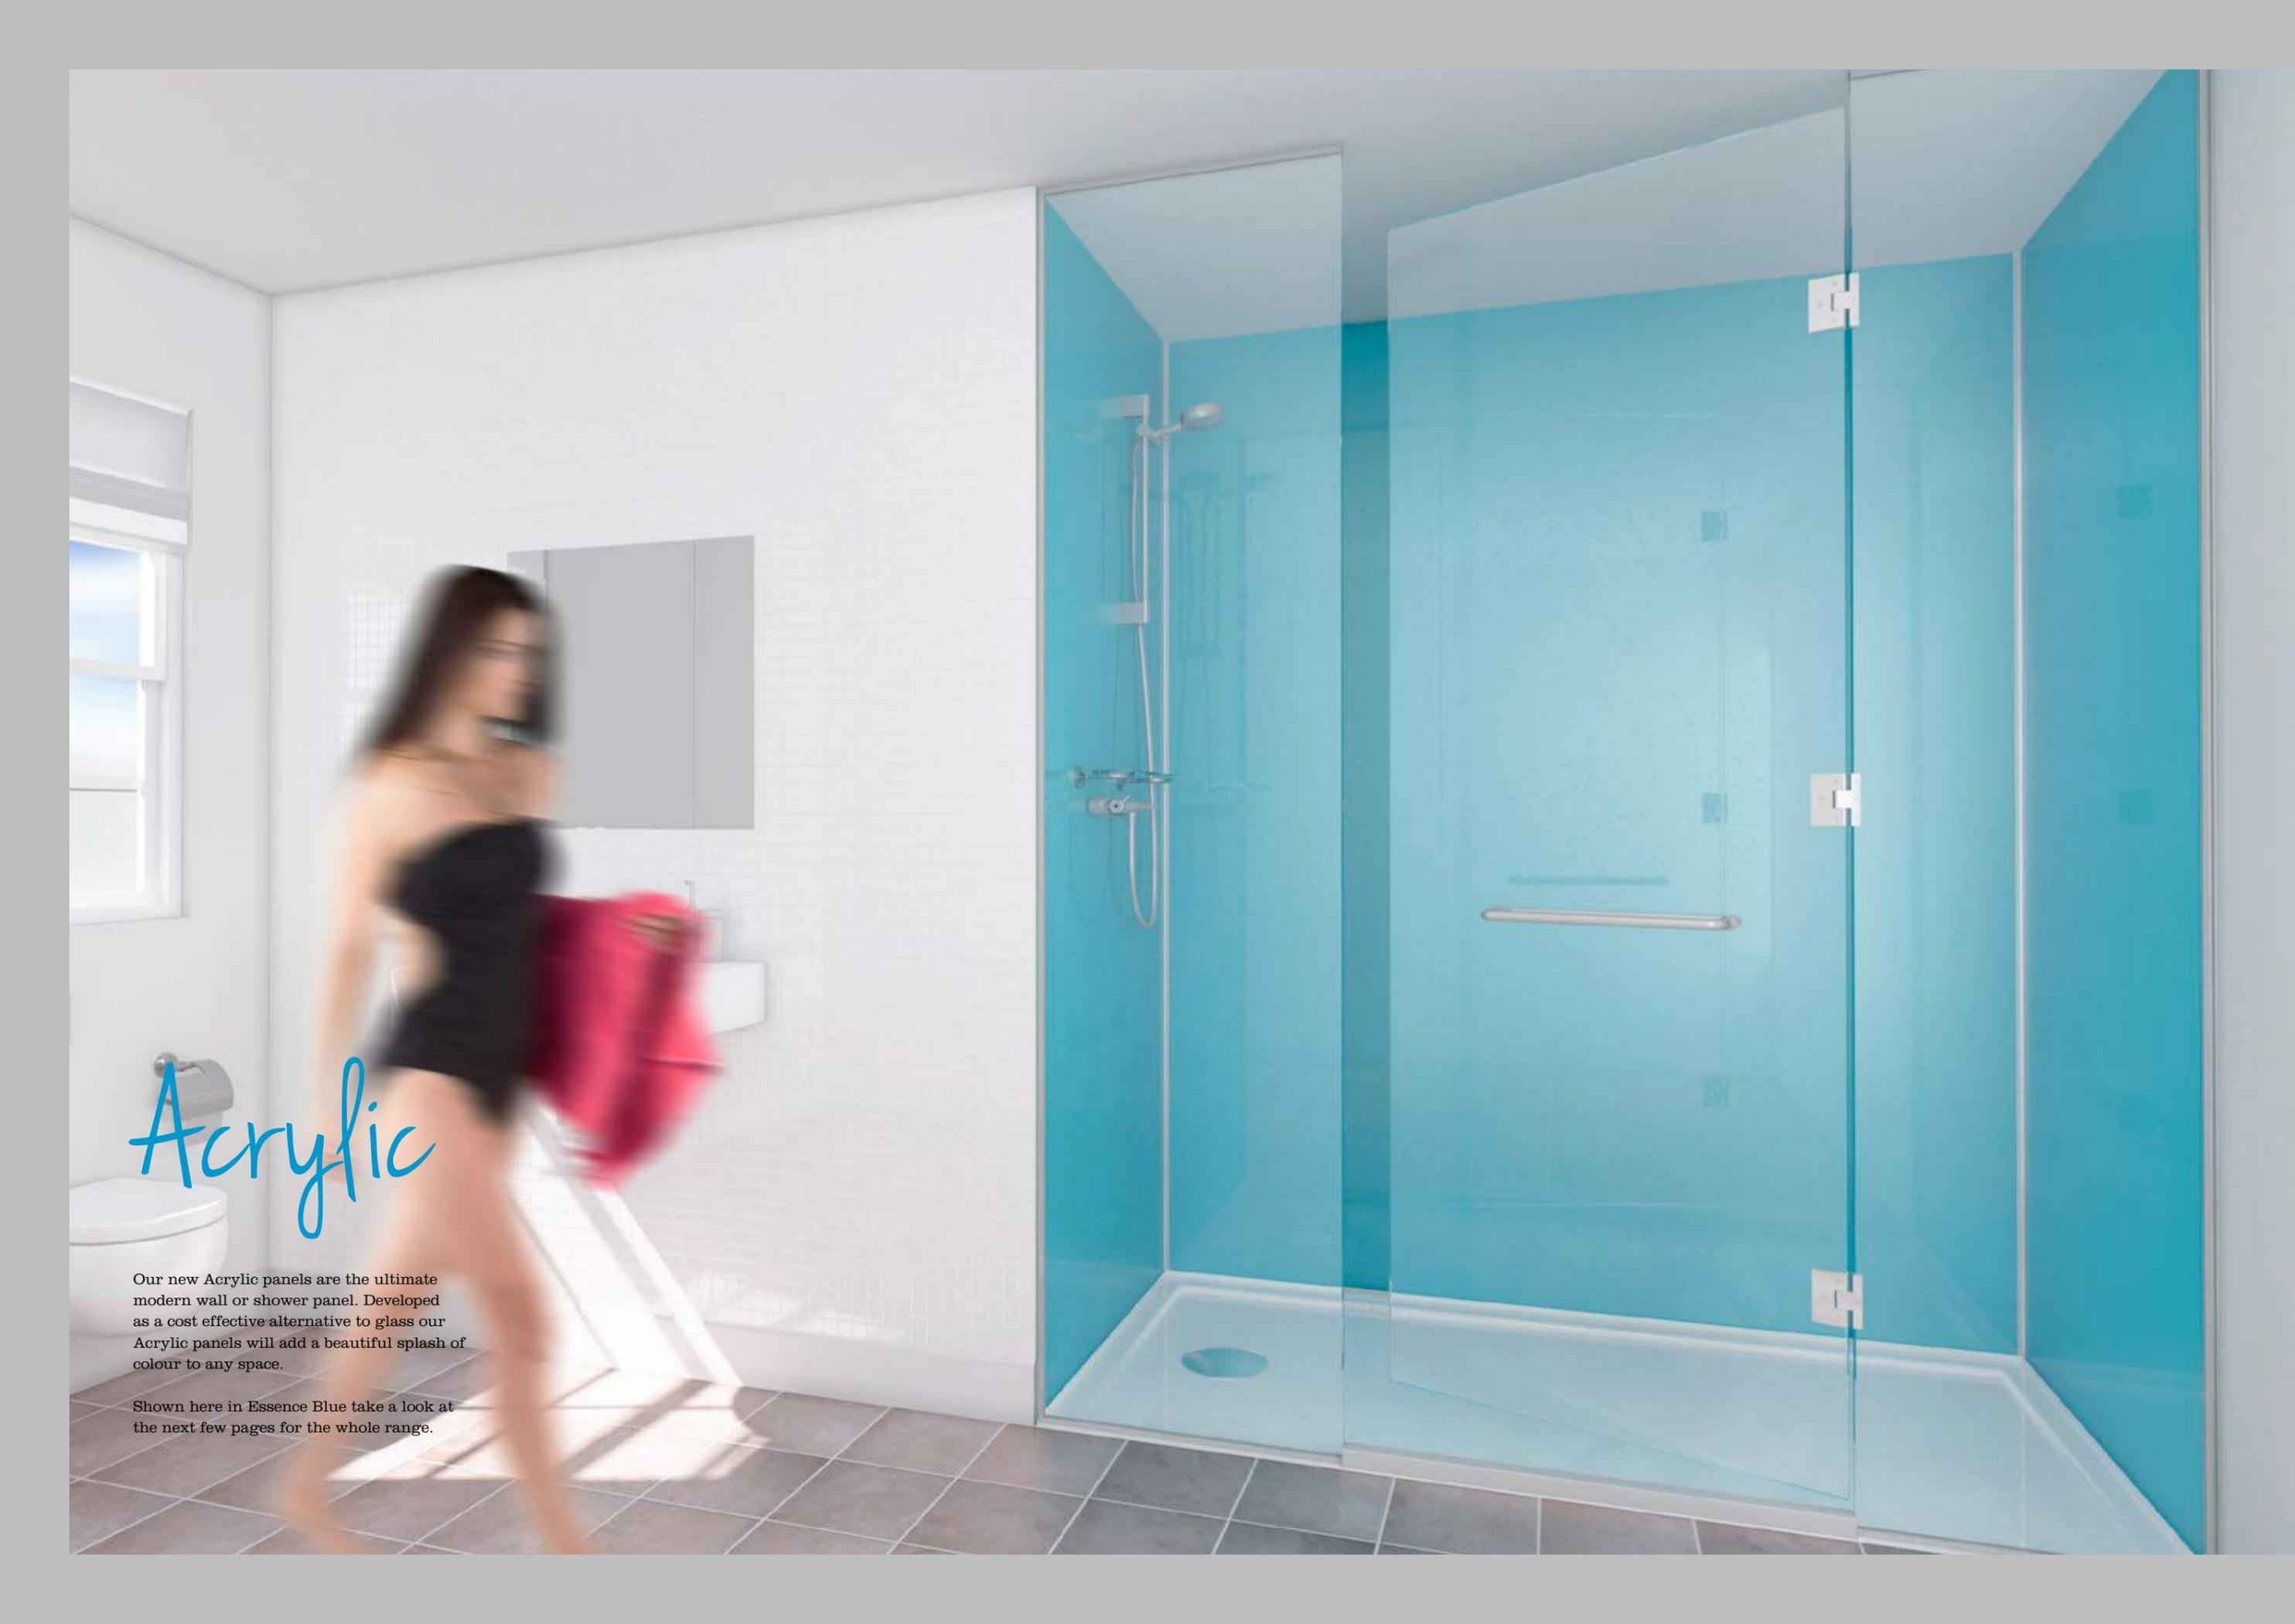

Our **Gloss** range offers clean, crisp glossy panels perfect for a clean, crisp bathroom. **Boutique** contains the panels with the boldest designs, for those who want to make a statement. Our **Italian** panels reflect the colours and textures of natural materials whilst our **Classic** range is for those who want an elegant touch to their bathroom.

Crafted in Scotland

All our panels are made on site in the same Perthshire factory since we first went into business over twenty years ago, infact we've even still got one or two guys on the shop-floor who have been with us since then.

It's this expertise which keeps us at the top of our market and ensures that every panel manufactured today is made to the same high standard that we have maintained over the last twenty years.

Acrylic

Our new Acrylic panels are the ultimate modern wall or shower panel. Developed as a cost effective alternative to glass our Acrylic panels will add a beautiful splash of colour to any space.

Shown here in Essence Blue take a look at the next few pages for the whole range.

Italian

Our Italian collection is inspired by the colours of Italy and developed to look and feel like natural materials. All are finishes that complete the look of a traditional bathroom but enable the modern Wetwall twist.

Shown here in Byzantine Marble, which we think works beautifully with the wooden floor and white plastered walls.

Vanities

We offer a selection of vanity surface designs that can be used to match or complement the panels used in and around your bathroom, enabling you to create the ultimate bespoke finish.

Technical Information

Specification

Wetwall is constructed of a Medite MR Grade MDF, covered on the face with a high pressure laminate and a balancing laminate to the rear of the panel.

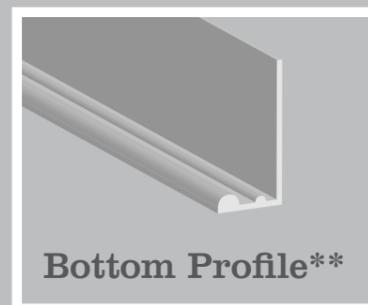

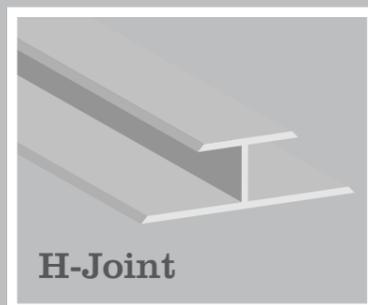

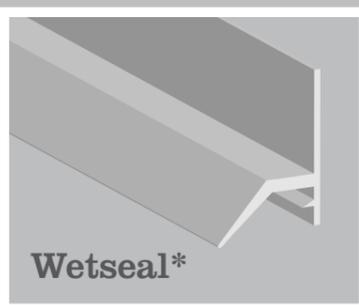

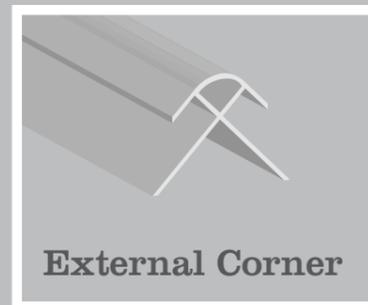

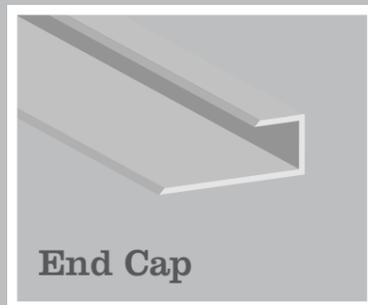

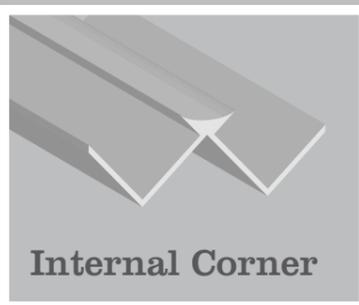

Our waterproof gluelines are D4 rated.

The shower panels are produced with a square edged finish as standard. A tongue and grooved wall panel is available for when the panels are needed to cover larger areas.

Type	Width	Edge Detail	Length	Thickness
Shower Panel	1200mm	Square Edged	2400mm	11mm
Shower Panel	900mm	Square Edged	2400mm	11mm
Wall Panel	585mm	Tongue & Grooved	2400mm	11mm
Vanity Surface	370mm	Bullnosed/Square Edge	2400mm	27mm

Accessories

Wetwall profiles come in 2400mm lengths and are available in satin anodised aluminium, white, polished gold, polished silver and signal black finishes (unless otherwise indicated). It is recommended that Wetwall Silicone Sealant and Adhesive is used for all installations.

*Wetseal only available in white pvc

**Bottom Profile only available in SAA

Tips

Cutting

When cutting the panels to width and height using a handsaw, the decorative face should be facing upwards. When cutting with a jigsaw or circular saw, the decorative face should be facing downwards.

Apertures

A clearance of 2-3mm should be left where pipes or fittings come through the panel even where collars are to be fitted. The clearance should then be filled with Wetwall silicone sealant.

Sealing

If a Wetseal is not being fitted then a 3-4mm gap should be left between the bottom of the panel and the shower tray or bath by using packers when fixing panels. The gaps should then be sealed using Wetwall silicone sealant. Wetwall silicone sealant should also be used in all the corner and capping profiles.

Wall Surfaces

The panels can be fixed to most surfaces using adhesive, providing they are sound and free from loose particles. The panels can also be fixed directly onto existing tiling providing they have been de-greased.

Fittings

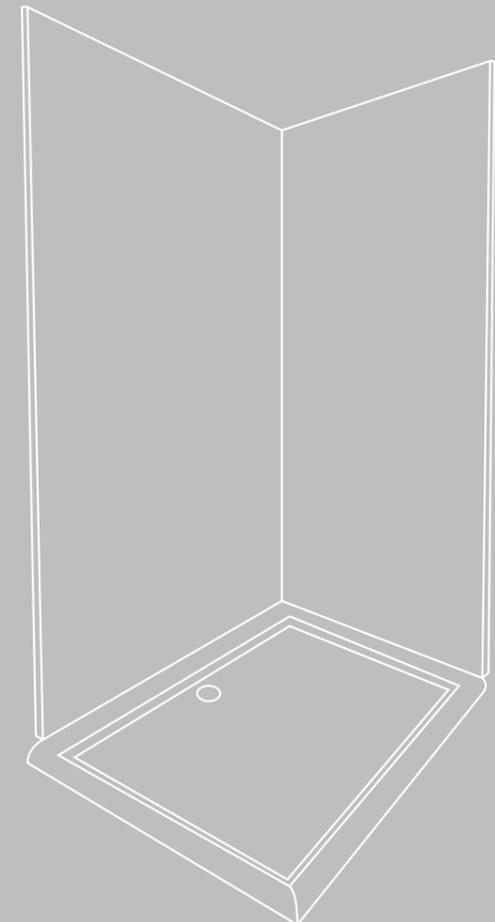

Fittings and shower attachments can be fixed directly to the panels using suitable fixings. Heavier items such as sanitary ware and accessible furniture will require the provision of additional support behind the panels.

Standard Installation

If you are unsure about any fitting details or have a different type of installation please refer to our full installation guidelines at: www.wetwall.com/fitting

Two Sided Shower

1. Fit an internal corner profile into the corner using appropriate fixings (screws), ensuring that the heads are countersunk to prevent fouling when fitting the panel.
2. Remove the film from the face of the panel and check for defects prior to cutting to size.
3. Apply a bead of sealant into one side of the internal corner profile, the amount of sealant applied should cover the channel bottom to a depth of at least 2mm.
4. The panels should be fitted such that a gap is formed between the bottom of the panels and the shower tray of between 3-4mm this should be filled with sealant and cleaned off flush with the front of the panels once all the panels have been fitted. (If using a wetseal profile kit please refer to the instructions provided within kit).
5. If end cap profiles are being used then these should be fitted to the outer edges of the panel now.
6. Apply a generous amount of adhesive in "snakes" to the panel and fit into place ensuring that the edge of the panel is inserted into the internal corner and a good seal achieved.
7. Repeat sections 2-6 for the second panel.

How we can help

Website

Visit www.wetwall.com for the latest information on our ranges of decors - we're always expanding the range, so you may see something new.

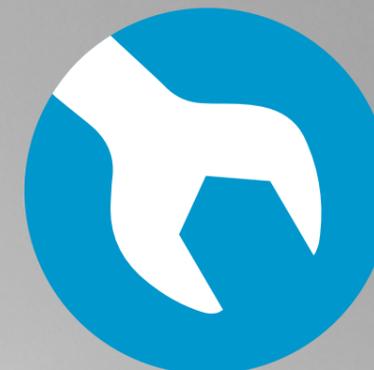

We also have links to our facebook and twitter pages.

Installation Video

For further help with installation, alongside our printed installation instructions we also have a filmed installation guide.

Go to our website to view.

www.wetwall.com/installation

Sample Hotline

To order a free sample of any of the decors that you can see in this brochure, give our sample hotline a call.

We recommend that you see a sample before ordering any of our panels and by using the tear out sheets in this brochure you should be able to narrow down the one's that interest you.

Please call [01738 494989](tel:01738494989)

Distributors

We have distributors throughout the UK, visit our website for information on the nearest one to you.

www.wetwall.com/distributors

Technical Helpline

To make sure that the installation process is as easy as possible for you or your fitter, we have a technical helpline. This will put you through to one of the team in Scotland, who will be more than happy to help with any questions.

Please call [01738 634455](tel:01738634455)

Service

For all the reasons on this page, from our phone support to our website, we're very proud of the service that we can offer to our customers.

We also offer a home delivery service and due to us having stock throughout the country, you will always receive the most efficient service possible.
